

**VERTICAL SERVICES**

# Capability Statement

## Access Solutions

With over 20 years experience, Vertical Services has been successfully servicing the oil and gas, mining and civil engineering industries since 1992.

Originally a rope access (industrial abseiling) company, our capabilities have now extended to include inspection, mechanical works and standby rescue. All of our services are available with or without the use of rope access.

With the main office based in Perth, Western Australia, Vertical Services prides itself on providing cost effective services that minimise disruption to client's operations.

We have built a reliable and professional reputation for exceeding expectations in a wide range of areas, including:

### ► Mechanical Repairs, Maintenance and Installation

Vertical Services has a strong and varied background in providing mechanical and maintenance services across all industries. Our multi skilled workforce allows us to create specifically tailored teams suited to any work scope. We can create welding teams for general welding and decommissioning works, mechanical fitting teams for such specialised activities as LNG loading arm maintenance or maintenance teams for cleaning and repair.

### ► Standby Rescue Services

We regularly work in confined spaces and difficult to reach locations. As a company we enjoy the challenge of identifying effective solutions to difficult work scopes raised by our clients. These challenges allow us to continuously develop our rope access procedures keeping Vertical Services ahead of the competition in efficiency and effectiveness.

### ► Shut Down Planning and Resourcing

Although rope access techniques are a specialty of our company, we recognise that rope access is only a method of reaching the work to be done. We are actively expanding the range and quality of services we can offer on ropes as well as on the ground.

We also believe that cross skilling our staff will greatly aid in our service offering to clients. As such, we actively encourage and assist our staff to obtain a range of skill sets. This in turn leads to a high level of staff satisfaction and a better quality of service for our clients.

### ► Non Destructive Testing (NDT) and Inspections Services (AICIP and API)

Vertical Services is a NATA accredited provider of both Non Destructive Testing (AS 17025 – UT Thickness, Magnetic Particle, Penetrant Testing) and Plant Inspection (AS 17020) services. These certifications ensure that we are meeting the highest possible standards when carrying out inspections for our clients.

We want to minimise any interruptions to your work routine. Our rope access services offer an easy solution with a small eco footprint. The minimal equipment required means exclusion zones are setup in the morning and gone by the evening, with no equipment left out overnight.

As a member of IRATA (Industrial Rope Access Trade Association) International, our personnel follow strict work procedures and are trained to meet the world's official standard for Rope Access Technicians.

Industrial rope access minimises on-site equipment, allowing you to get back to business quicker.

Safety is our top priority

## Access Solutions:

Vertical Services delivers tailored solutions for our client's access needs selecting the most cost effective methods

## High Quality:

Vertical Services prides itself on providing highly efficient and experienced multi skilled technicians to ensure exceptional quality of workmanship
